INTERNSHIPS

Content Writing

EtherWorld (Virtual)

Oct 2017 - Present

I write articles for Etherworld which is a child company of Avarch LLC.
I write on topics related to various cryptocurrencies

Web Development Intern

InfyShield (Virtual)

Jul 2017 - Sep 2017

I'm working on making the website more responsive and faster on mobile phones and also, I'm implementing a new design for the website.

Market Research

Mcaffeine (Virtual)

Nov 2016 - May 2017

Here, I worked as a market research intern. I studied many e-commerce websites and body care brands and found out ways to increase sales and market reach.

The company was really impressed with my work that they decided to reward me with a LoR

POSITIONS OF RESPONSIBILITY

- Head, Innovative Androids
  Innovative Androids is the Robotics Cub of Mahindra Ecole Centrale, Hyderabad

- Vice Head, Enigma
  Enigma is the CS Club of Mahindra Ecole Centrale, Hyderabad

- Mentor for Opencode18, an open source event organized by IIIT-Allahabad.
  My project Utlyz-CLI got selected for this event for which I'm a mentor

- Organising Committee Member under the Website Development Team of TEDxMahindraEcoleCentrale which is being conducted in Mahindra Ecole Centrale

- Vice Captain of P. Obul Reddy Public School in 2014

TRAININGS

Devops

Peers Academy, Ameerpet (Hyderabad)

Dec 2017 - Jan 2018

Learning about what exactly DevOps is and the tools used for Continuous Integration (Jenkins and Maven), Continuous Deployment (Git and Docker) and Configuration Management (Chef and Puppet).

Linux Fundamentals

edX (Online)

Nov 2017 - Present

Learning about the Linux commands that are useful for a developer and things like Bash Scripting which help in writing scripts

Digital Marketing

Akash Digital Marketing (Online)

Jan 2017 - Mar 2017

Learnt various parts of digital marketing including SEO, SEM , organic and inorganic ads, website development , affiliate marketing, email and mobile marketing and so on

PROJECTS

Attendance Manager

Nov 2017 - Nov 2017

https://github.com/rahulkumaran/Attendance-Manager

A personal project which I took up to reduce the troubles my professors faced in college while taking the attendance! So created a program to show the roll numbers of the people who were absent!

Operating Systems Projects

Dec 2017 - Present

https://github.com/rahulkumaran/Operating-Systems-Projects

We currently have an OS course going on in college and get some really interesting assignments to perform like creating an extended shell, inter process communications and so on. This project contains code for all such assignments

UtlyzMeBot

Feb 2018 - Present

https://github.com/rahulkumaran/UtlyzMeBot

UtlyzMeBot is an extension to the Utlyz-CLI project, where I've extended the features of this to a mobile interface too apart from it just being a Desktop app. It's a bot now on Telegram which is up and running and anyone can use it

Multi Purpose Command Line Application

Dec 2017 - Present

https://github.com/rahulkumaran/Utlyz-CLI/

Basically, this is a project which I started out of my own interest in order to make sure that I wouldn't have to use the browser for everything! I use the CLI a lot and tried to integrate some features which I use daily into the command line itself
